

BZ13DEPID Bezzera 1 Group Semi-Professional Espresso Coffee Machine

Quick Overview

The model BZ13 can be installed anywhere without connections to the main water supply net; thanks to the boiler system with heat exchanger and to the practical group heating system cappuccinos, coffee and tea can be produced for small communities. The new hydraulic and electric system allows to reach a thermal stability and an accurate setting of the temperature equal to machines in the professional segment.

Description

Bezzera 1 Group Semi-Professional Espresso Machine BZ13DEPID

Semi-Professional Espresso Automatic 1 Group Boiler 1.5L

The model BZ13 can be installed anywhere without connections to the main water supply net; thanks to the boiler system with heat exchanger and to the practical group heating system cappuccinos, coffee and tea can be produced for small communities. The new hydraulic and electric system allows reaching a thermal stability and an accurate setting of the temperature equal to machines in the professional segment.

With a volumetric dosage for coffee brewing controlled by a microprocessor. The 2 doses setting is done by the push-buttons and third push button for manual continuous coffee brewing. The PID temperature control system replaces traditional pressure switch and shows the boiler temperature on a display; the temperature can be adjusted by the user in a range from 80C ° to 100C °.

- Electrical heating;
- Automatic boiler water supply
- Automatic stopping of electric resistance in case of lack of water in the boiler
- Vibration pump

NOTE: 12 Months part warranty only.
